Feel the drive

A WARM WELCOME FOR THE ROMAHOME R25.

Romahome's new R25 is their latest generation of Berlingo-based motorhome. A Webasto Thermo Top C300 diesel fuelled heating system provides a warm welcome for owners of this chic new model as part of an impressive list of features which includes luxury 2 berth accommodation, ample storage, toilet and spacious kitchen area – all in an easily handled and stylish package.

The Thermo Top system heats both the interior and the on board hot water supply – offering the option to enjoy a proper wash – with operation either on demand or pre-set by a programmable timer, producing both hot water and blown air cabin heating “on the move”.

The compact dimensions of the heater unit appealed to Romahome's designers, who were tasked with utilising every cubic inch of space available inside the new model.

Speaking of the new heater Brian Bailey, Romahome's Managing Director said:

“We have vast experience of building compact motorhomes on Citroen base vehicles but we have also taken notice of feedback from existing and potential new customers in creating the R25. This is the second model in our range of our motorhomes to offer an advanced Webasto heating system and I am certain our customers will really enjoy the benefits it brings. There's nothing as pleasant as a warm interior during cold weather touring and the Thermo Top's quiet, efficient and economic performance transforms the R25 into a year-round leisure vehicle.”
